31-Mar-2026	Customer Receipt - LMN Stores		5,34,499	6,84,500

Synthetic Testing Notes

Expected FinDocAI behavior: classify this as a BANK_STATEMENT; extract account metadata and transactions; calculate credits/debits and cash-flow metrics; identify the 12-Mar-2026 ■9,99,999 transaction as an unusual transaction; and use the transaction history as evidence when answering document questions. The high-value transaction is intentionally synthetic and should be treated as an anomaly requiring review, not as confirmed fraud.

Suggested questions for the FinDocAI Assistant

1. What is the closing balance?
2. What are the largest debit transactions?
3. Which transaction looks unusual?
4. What was paid to XYZ Raw Materials?
5. What was the highest-value credit?
6. Summarize the financial activity in this statement.
